EDUCATION

1. SINDH MADRESSATUL ISLAM UNIVERSITY

Computer Science

2023 - 2027

Skills

-
1. **Skills:** HTML & CSS (beginner), MySQL, C, Java, AWS Deployment, AI agent Development.
 2. **Tools:** Vscode, Xampp, Net Beans, AWS Console, n8n

PROJECTS

1. Developed a Java GUI- Based Inventory Management System

- Java Swing inventory management application with a GUI for adding, updating, and deleting items (price & quantity). Features: cart functionality, automated billing with quantity calculations, PDF invoice generation (customer name & phone), invoice retrieval via GUI, and record storage in MySQL (php My Admin).

2. Designed and developed a responsive personal portfolio website

- A responsive personal portfolio website using HTML, CSS, and JavaScript to showcase projects, technical skills, and professional background; implemented clean UI/UX principles to enhance user engagement and accessibility.

3. Instagram Lead Generation Scraper – n8n Workflow

- An automated lead generation system built with n8n. It allows users to enter a target audience (keyword + location) via a form then scrapes Instagram profiles through a Google search API. The workflow extracts key details such as username, channel name, follower count (normalized to exact numbers), bio/description, and profile URL. All structured data is then pushed directly into Airtable for easy lead tracking and management. Designed for marketers, agencies, and businesses who want to streamline Instagram prospecting and eliminate manual data collection.

Other Projects:

4. **YouTube Video Summarizer** – n8n Workflow & API (Apify & Google Gemini)
5. **WhatsApp Chat Bot** – n8n workflow & API (Google Gemini & Facebook Developers)
6. **Restaurant Management System** – Java GUI & MySQL (php My Admin)
7. **Pesticide Management System** – Java (Spring Boot), Frontend (HTML & CSS), & MySQL (php My Admin)

You can find most of my projects on LinkedIn, and my profile link is given at the top
